1999-07-15 With the graying of society, therapists are seeing more and more older clients. In this book, editor Michael Duffy brings together leading experts to explain the unique problems of older adults and describe effective treatment techniques.

*Treating Trauma in Christian  
Counseling* Heather Davediuk

Gingrich 2017-12-19 Traumatic experiences are distressingly common. And the risks of developing posttraumatic stress disorder are high. But in recent years the field of traumatology has grown strong, giving survivors and their counselors firmer footing than ever before on which to seek healing. This book is a

combined effort to introduce counseling approaches, trauma information, and Christian reflections to respond to the intense suffering people face. With extensive experience treating complex trauma, Heather Gingrich and Fred Gingrich have brought together key essays representing the latest psychological research on trauma from a Christian integration perspective. Students, instructors, clinicians, and researchers alike will find here an overview of the kinds of traumatic experiences coverage of treatment methods, especially those that incorporate spirituality material to critically analyze as well as emotionally engage trauma theoretical bases for trauma treatment and interventions references for further consideration and empirical research Christian

Handbook of Family Life Education Margaret E. Arcus

1993-09-28 The first synthesis of the field, the two volumes of the Handbook of Family Life Education provide a critical perspective on family life education in theory and practice. Volume One discusses the nature, history and scope of the field. The contributors concentrate on the crucial question of values, on issues of professionalization of family life educators and on programme planning and evaluation. The most important components in family life education are discussed, including topics such as: race, ethnicity, gender and religion.

#### Handbook of Family Therapy

Mike Robbins 2004-03-01 This new Handbook of Family Therapy is the culmination of a decade of achievements within the field of family and couples therapy, emerging from and celebrating the dynamic evolution of marriage and family theory, practice, and research. The editors have unified the efforts of the profession's major players in bringing the most up-to-date and innovative information to the forefront of both educational and practice settings. They review the major theoretical approaches and break new ground by identifying and describing the current era of evidence-based models and contemporary areas of application. The Handbook of Family Therapy is a comprehensive, progressive, and skillful presentation of the science and practice of family and couples therapy, and a valuable resource for

This clinician's manual and workbook were developed to provide alternatives in the efforts to reduce the national epidemic of spouse/partner maltreatment. Geffner and Mantooth describe a model incorporating several theories and approaches of psychotherapy, while focusing on abuse as a primary issue. The program and techniques have been used and improved for more than 15 years in programs across the country. The clinician will receive a comprehensive intervention program that includes 26 weekly sessions that address how to initiate the foundations for a therapeutic relationship; communicate and express feelings; teach self-

management and assertiveness techniques; discuss intimacy issues; and implement a relapse prevention program. Each session contains brief intervention techniques, handouts, and homework assignments. The advantage of this approach is its flexibility. Modifications to the order in which the sessions are conducted can be made by trained clinicians to fit the needs of their clients.

**Therapy** S. Richard Sauber 1993-08-09 As the study of the family has expanded, the need for an up-to-date volume that brings together and defines major salient words, phrases and concepts has similarly grown. The updated edition of this unique resource provides an expanded yet compact and handy reference for all practitioners, researchers and students in the fields of family psychology and psychotherapy. Each entry includes a definition of the term, an example of its use, the origin of the term, an early source using the term

#### **Handbook of Prevention**

Barry A. Edelstein 2012-12-06  
Americans are "healing themselves" (Heckler, 1985) and prevention has taken root (McGinnis, 1985a). We are altering our lifestyle to reduce physical and mental health risks. Perhaps as important is the fact that the science of prevention is beginning to catch up with the practices of prevention, although some might argue that the popularity of these practices far outstrips sound theoretical and empirical foundations. The chapter authors in this volume examine the theoretical and empirical foundations of many current prevention practices and, where data exist, discuss the status of prevention efforts. Where substantial prevention is not yet on the horizon, the authors attempt to point us in the right direction or at least

share with the reader some of the risk factors that should be addressed in our research. We hope that readers will be stimulated to discuss the issues raised, advance the current research, and, where possible, adopt the prevention and health promotion strategies that are supported by sound theoretical and empirical work. This volume can in no way be comprehensive with respect to the current work in prevention; however, we hope that we have provided a sampling of prevention activities and issues that appear together in one volume for perhaps the first time. The primary intent of this volume is modest, and the reader should not attempt to find continuity among the various chapters. The only binding among these contributions is their focus on prevention.

system, and the programs, policies, and practices within it, are subject to increased public scrutiny, due to well-founded concerns over effectiveness, fairness, and potential unintended consequences. One of the best means to address these concerns is to draw upon evidence-based approaches demonstrated to be effective through empirical research, rather than through anecdote, standard practice, or professional experience alone (National Institute of Justice, 2011). The goal of this book is to describe the most useful, actionable, and evidence-based solutions to many of the most pressing questions in the criminal justice system today. Specifically, this edited volume contains brief and accessible summaries of the best available research, alongside detailed descriptions of evidence-based practices, across different areas of the criminal justice system. It is written so that practitioners and researchers alike can use the text as reference tool in their work

and in training the new generation of individuals working to improve the system. Researchers and practitioners in many areas of criminal justice - crime prevention, policing, courts (prosecution, defendants, judges), corrections, sanctions, and sentencing - can reference specific chapters in this book to guide their policy and practice decisions. Although theory is a guide for the practices described, the chapters will address practical issues in implementation and action. This book overcomes the limitations of previous criminal justice practice books in that it is written as a practice resource and reference guide and spans practices and policies across different sectors of the criminal justice system - from prevention to policing to sanctions and corrections. Each chapter contains a list of action items, based upon the best available scientific research, that can be implemented in practice to address key issues and long

standing challenges in the criminal justice system. Family Psychology II Luciano L'Abate 1987 This second collection of writings covers the main topics that define the newly created specialty of family psychology. Family therapy is limited to a single approach devoted to the treatment of families in trouble; family psychology encompasses the entire range of family functioning, from optimal to pathological. *Families in Transition* Lynne A. Bond 1988-04 This volume presents a group of exemplary prevention programmes, documents their accomplishments and provides models for the future development of other programmes. Each of the contributors has gone beyond the stage of theorising and model building to translate ideas into fully operating programmes which have been evaluated and demonstrated to be effective. The prevention/promotion efforts presented, consider the well being of individuals, the family

unit as a whole and broader societal structures in which families are embedded. The focus is on both normative and non normative family transitions through the life span of the family.

Principles and Practice of Psychiatric Nursing Gail Wiscarz Stuart 1987 Principles and Practice of Psychiatric Nursing, 8th Edition provides comprehensive coverage of psychiatric nursing. Beginning with fundamental coverage of all key psychiatric nursing principles, it goes on to address the complete continuum of care - including mental health promotion and illness prevention, crisis intervention, and psychiatric rehabilitation and recovery. The book then applies

psychiatric nursing principles to specific clinical disorders based on adaptive-maladaptive coping responses, the six-step nursing process, and DSM-IV-TR and NANDA diagnoses. Subsequent chapters describe various modalities of treatment (psychopharmacology, somatic therapies, cognitive and behavioral therapies, managing aggressive behavior, and more), hospital-based and community-based care, and treatment of special populations.

*Sourcebook of Family Theories and Methods* Pauline Boss 1993-03-31 Origins We call this book on theoretical orientations and methodological strategies in family studies a sourcebook because it details the social and personal roots (i.e., sources) from which these orientations and strategies flow. Thus, an appropriate way to preface this book is to talk first of its roots, its beginnings. In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of

itself. A goal was thus set to write a book that, like Janus, would face both backward and forward a book that would give readers both a perspective on the past and a map for the future. There were precedents for such a project: The Handbook of Marriage and the Family edited by Harold Christensen and published in 1964; the two Contemporary Theories about the Family volumes edited by Wesley Burr, Reuben Hill, F. Ivan Nye, and Ira Reiss, published in 1979; and the Handbook of Marriage and the Family edited by Marvin Sussman and Suzanne Steinmetz, then in production. *Primary Prevention of Psychopathology* 1988

Family Life Education Lane H. Powell 2006-08-15

Contemporary family life educators must operate in a wide range of settings and with increasingly varied populations and families. In the second edition of their successful *Family Life Education*, Powell and Cassidy expertly expose readers to the diverse landscape of the field while laying a comprehensive, practical foundation for future family life educators. The authors, both CFLE-certified,

consider the Certified Family Life Educator certification requirements of the National Council on Family Relations throughout the text. Their broad overview of the field features a blend of theory and practice, with full chapters on sexuality education, marriage education, and parent education areas that have received evaluation and certification attention. A new chapter on global trends builds awareness and appreciation of diversity through interactive classroom exercises. Each chapter in the book concludes with discussion questions, research problems, independent-study activities, and case-study suggestions, all designed to challenge readers to think for themselves.

diverse issues faced by ageing families, the effects these issues have on individual family members and the entire family unit, and methods of strengthening family functioning. The contributors emphasize the diversity that exists in families, looking at divergence within the classic family form as well as examining newly emerging family structures such as gay and lesbian families. Extending beyond counselling and therapy for ageing families, the book proposes preventative techniques aimed at building competencies and explores how policy intersects with family practice.
